Inline Window Systems

AMBIANCE™

Inline Window Systems

We're passionate about making your place feel great; being part of homes that are more comfortable to live in, cost less to heat and provide sanctuary from surrounding sounds

It is important to breathe warm, dry, good quality air which is why our each of our New Zealand made building systems are designed to enhance the performance of your place, create a better atmosphere.

New Zealand

Nationwide
service

You've probably already noticed there's something different about the way Stärke AMBIANCE™ windows and doors feel. We've set ourselves a higher standard for performance on almost every measure possible. The difference may be unseen but it's all around us - creating positive changes in the atmosphere and how it makes your place feel.

**We make the things you cannot see better
– silence, energy, warmth, air quality.**

A small change makes a big difference

Enjoy the sanctuary and peace of a quieter home, no matter what is happening around you.

Better performing windows don't only protect your home from the elements by reducing the transfer of heat; our energy efficient AMBIANCE™ Inline Window Systems also help to make your home quieter – reducing the transfer of surrounding noise by 38dB.

Stärke AMBIANCE™ Inline Windows have been designed as a complete system to ensure the window's thermal protection mechanisms are aligned with the insulation inside your wall – the thermal protection is inline which improves your energy efficiency.

Pictured - Timber interior window reveal and architrave.

Option - Intergrated interior window reveal and architrave also available.

Designed as a complete system – better protecting your home from the elements.

Benefits that continue to multiply over time.

Energy Efficient

38% more energy efficient*.

Lower Lifetime Cost

Reduced heating and cooling costs.

Better Air Quality

Reduced condensation, drier air.

Durable

Tested to exceed NZS4211 Window Performance standards.

Sustainability

Made from recyclable materials.

Secure

Structurally reinforced with galvanised steel.

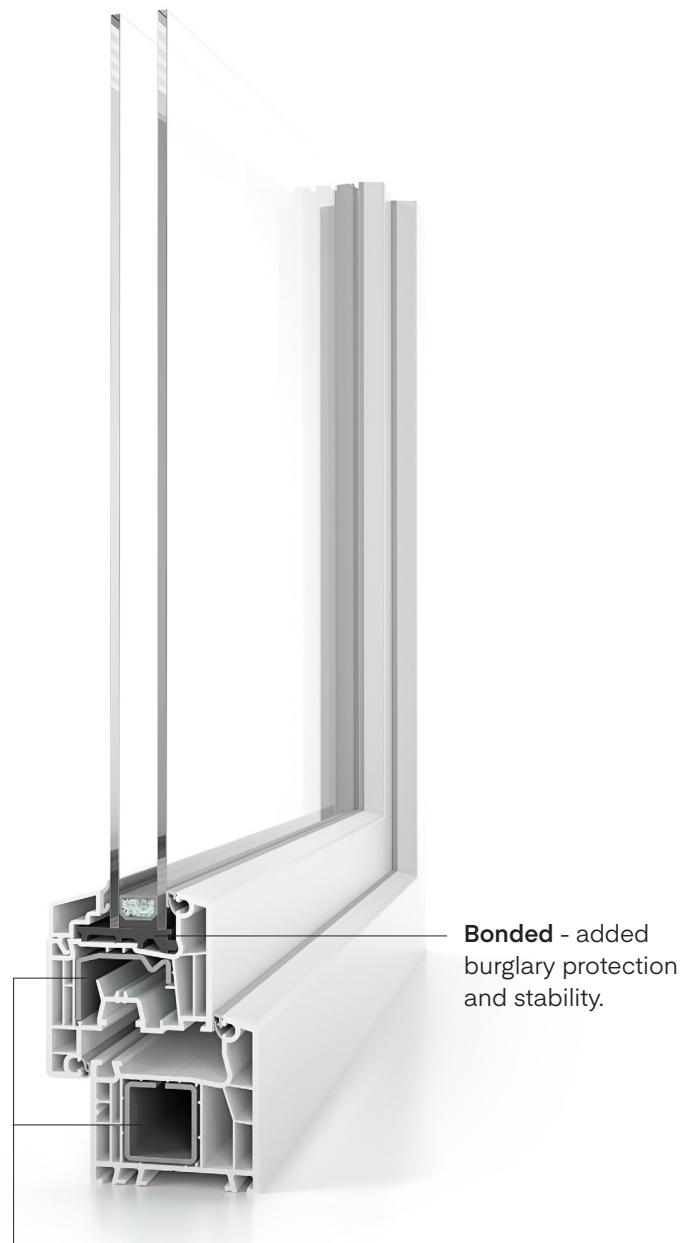

Quieter

Tested to reduce surrounding sounds by 38dB.

No Condensation

Wake up to dry windows.

Bonded - added burglary protection and stability.

Reinforcement - strong, corrosion-resistant steel profiles ensure high stability, reliability and a long service life.

Savings

We want you to enjoy the comfort of a warm, dry home without it costing a fortune to heat.

Windows typically account for up to 40% of energy loss in a home. We don't think anybody should have to sleep in a damp home or wake up to wet windows, that's why Stärke AMBIANCE™ Inline Window Systems have been designed to exceed the thermal performance standards of the New Zealand Building Code H1.

How much the H1 will save you every year

OPTIONS

- we make it easy

TRADITIONAL

Stärke AMBIANCE™ Inline Window Systems are available in a range of traditional styles including awning and casement windows, sliding, bi-fold and hinged window and door configurations.

EUROPEAN

The technology utilised in Stärke AMBIANCE™ Inline Window Systems has been proven across Europe for decades. Stärke also offers other key innovations that have been tried and tested throughout Europe and North America.

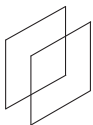

Fully Integrated Multi-Point Locking System

Concealed within the window are multiple inline locking points. This not only improves security preventing prying windows open for the side but it also creates a tighter seal which further improves your energy efficiency.

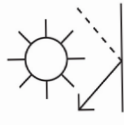

Tilt & Turn window technology

These unique window configurations open inwards as compared to traditional windows which open outwards. Tilt & Turn windows offer security advantages over traditional windows and the 'tilt' feature is an effective way to ventilate your home while deterring intruders.

Double
Glazing

Low-E
Glass

Argon
Gas

Premium glazing technology

We're raising performance standards, with premium glazing technology standard on every Stärke AMBIANCE™ Inline Window Systems.

Looking after our planet is the only option

It's reassuring to know that our windows contribute to creating a brighter tomorrow for future generations.

Not only do we use recyclable materials wherever possible, the best bit is our high-performance windows outperform traditional windows by 38%* helping to reduce energy consumption. Stärke is ISO 14064-1:2018 environmentally certified with a goal of being carbon neutral by 2023.

We're committed to a brighter future, that's why we're proud to be a business with Carbon Footprint certification. Measuring the carbon footprint of our business operations helps us to realise strategic opportunities to continuously improve. Follow our journey on our website www.starke.co.nz

Stärke products are tested to exceed NZS4211 Window Performance standards. Windows & doors have a 5 year manufacturers. For more details, please visit our website. **Discover the difference for yourself at our energy efficient windows and doors experience centre.**

**AMBIANCE™ Inline Window System is 38% more energy efficient than traditional thermally broken aluminium.*
